## PROJECT UPDATE

The I-70 Phase 2D project is in its 27th month of construction.

In May, crews completed the base asphalt for the new lanes of I-70 west of the South Street bridges, completed the east abutment (end support) for the widened bridges, and continued work to create "rock sockets" for the foundations of the bridge pier (central support column).

Construction activities scheduled for June include excavation of the pier foundation, base asphalt for I-70 east of the bridges, and installation of ditch liner.

Construction activities for July include pier construction and installation of guardrail. Project completion is anticipated by the end of 2013, weather permitting.

For everyone's safety, please drive carefully, stay alert and reduce speed when traveling within the project work zone.

**We request that the public not trespass in construction areas.**
